

Free Six Sigma Workshops

Success Factors for Business Improvement

Learn from **practitioners** what
makes Lean Six Sigma **work**

This half day workshop offers the unique opportunity to gain insight into successful Lean Six Sigma programmes and exchange ideas with fellow practitioners, leading academics and consultants on success factors for business improvement.

The goal of Lean Six Sigma is to successfully identify and manage business improvement projects that save costs, eliminate waste and increase revenue. What sounds fairly easy in theory can turn out to be challenging in real life.

Our free workshop offers the possibility to experience and discuss the latest findings of SigmaPro and Aston University's research project into success factors for Lean Six Sigma and Business Improvement. We will explain the research carried out, present our own conclusions and invite you to join in the discussion on how to make your company improvement programmes successful.

The workshops will also include guest speakers from Academia and Industry who will present their experiences on the theory and practice of making Lean Six Sigma work.

Dates & Venues

Fri – 30/07/10 – **Jury's Inn, Leeds**

Cost
